Year Built: n/a
Status: For Sale only

Property Details

At the northern end of Long Island lies over 890 acres of unspoiled beauty, the site of the planned Port St. George development, the Bahamas' first large-scale eco engineered destination. This development concept comprises a residential resort including extensive hospitality and sporting components, a 640 berth marina as well as exquisite retail, dining and entertainment facilities. The Port St. George concept has received the approval from the Bahamian Government. Very rarely does an investment opportunity arise in The Bahamas offering such a great deal of contiguous virgin land together with extensive development plans, environmental impact assessment and management plans, feasibility studies as well as contacts with proposed hotel, marina, sports, leisure and entertainment operators. Port St. George provides a serious investor with a unique, once in a lifetime chance to step into a well planned development concept and bring this fantastic opportunity to fruition.
